## The Cert Difference

Buckeye **Cert** is an exceptional creme cleanser formulated for cleaning porcelain, enamel, tile, stainless steel, fiberglass, or any surface requiring abrasive action. This specially designed scouring cleanser contains grease emulsifiers, wetting agents, a finely divided carbonate abrasive, and a special lubricating agent to provide uniform abrasive action without causing deep scratches.

**Cert** effectively cleans the grout on tile floors in shower stalls and restrooms, and is safe for both the surface and user.

## FEATURES

- Versatile – cleans many types of surfaces
- Cleans, brightens and polishes
- Residue-free
- Easy-to-use squeeze bottle

## WHERE TO USE

**Cert** is specifically designed for cleaning and polishing ceramic tile, porcelain and enamel fixtures – i.e., tubs, sinks, shower stalls, and metal hardware. **Cert** may also be used on enameled woodwork as well as stainless steel, pots and pans.

## DIRECTIONS FOR USE

Apply to surface with damp sponge or cloth, or apply directly to surface from pop-up top. Rub lightly until surface is clean and polished. May be rinsed off or wiped with a dry or damp cloth.

**Cert** leaves no white residue.

**Note:** ONLY USE ON SURFACES NOT HARMED BY MILD ABRASIVES. To prevent scratching of soft metals (like aluminum), fiberglass, plastic, and appliance enamels, use product sparingly and rub gently with a damp sponge or cloth.
