One-step cleaner and gloss restorer

Floortonic Burnishing Liquid extends the service life of your floor finish and wood floor coating and reduces your labor costs! This one-step cleaner and restorer is formulated to work with the heat and friction of a high-speed burnishing pad to enable the polymers of the floor finish and wood floor coating to smooth out more readily.

The components of Floortonic act as a “heat-activated assist” that reduce the damaging abrasion of high speed floor pads, resulting in higher gloss and tighter slip resistance. Unlike restorers that are based on polymer chemistry, Floortonic contains no polymers, doesn’t contribute to buildup problems, doesn’t require that the floor be pre-cleaned, and increases slip resistance.

Advantages:

- Saves time, requires less equipment
- Extends the life of your floors
- Improves workers morale
- Doesn’t lead to buildup
- Safe on floor finish and wood floor coating
- More shine with less abrasion
- Versatile

Features:

- One-step cleaner and restorer
- Improves gloss
- Improves slip resistance
- Contains no polymers
- pH neutral
- Compliments friction with burnishers
- Use with autoscrubbers or mop and bucket applications

DIRECTIONS

1. Dust mop floor to remove gross soils.
2. Dilute Floortonic 6 ounces per gallon of cool water (1:20) into an autoscrubber or bucket.
3. Clean floor as usual and allow to dry thoroughly.
4. Burnish floor to a high gloss using any high speed machine (1500 RPM's and up) using the appropriate pad for your finish or wood floor coating.

Technical Specifications:

Actives	13.0%
pH Concentrate	7.4±0.2
Weight/Gallon	8.38
Flash Point	None
Fragrance	None
Color	Opaque White
Abrasives	None
EDTA – Phosphates	None

Available in:

Note:

This product should not be used as a deep scrub cleaner prior to applying fresh floor finish or wood floor coating. Use traditional cleaners such as Straight-Up® pH Neutral Cleaner, Buckeye Blue All-Purpose Cleaner, or Buckeye Green Light™ Super Concentrated Floor Cleaner.
