## PHOSPHATE-FREE CONCENTRATE FOR AUTOMATIC WASHERS

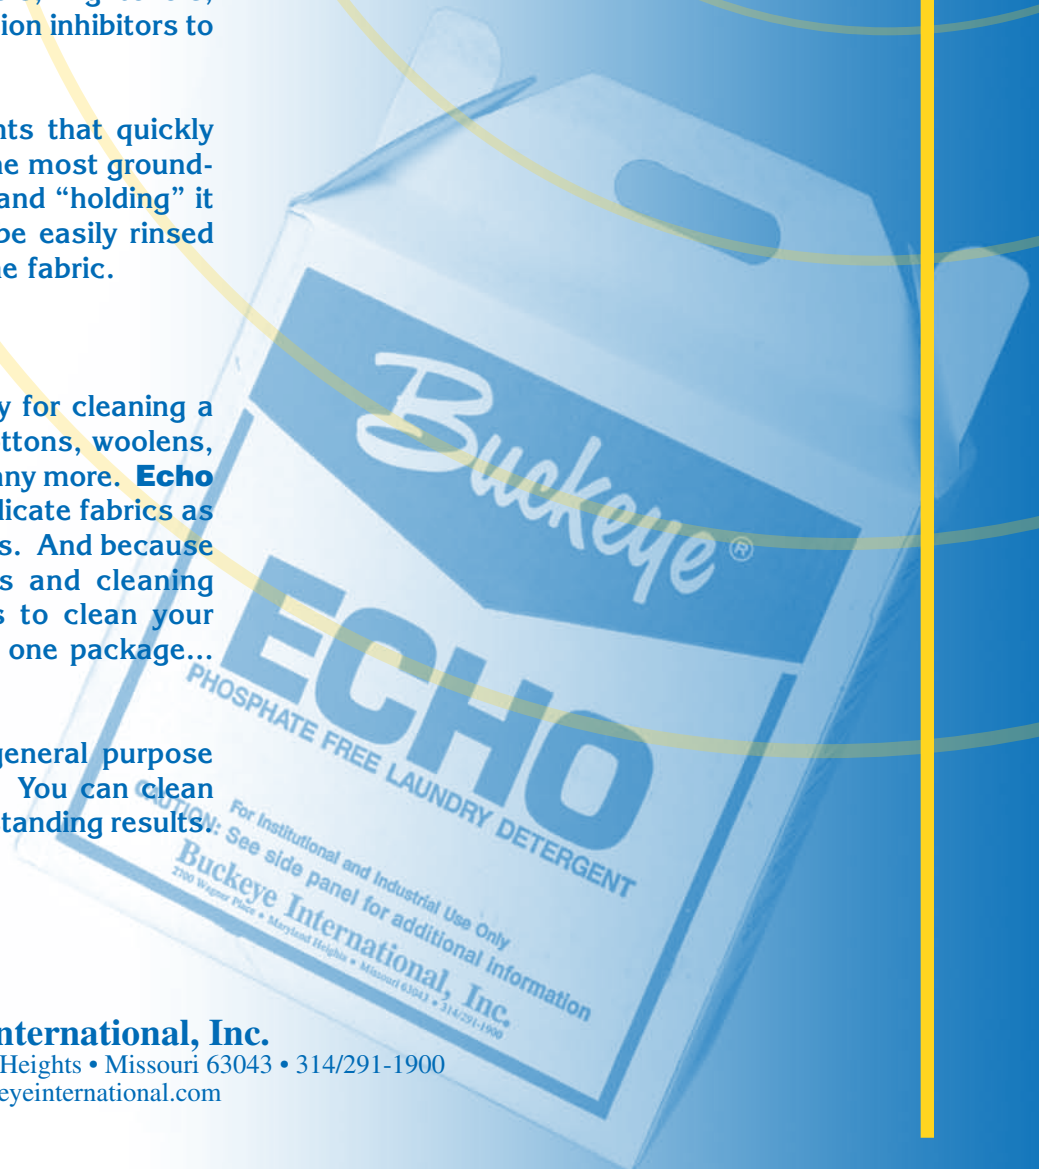

**Echo** is a non-phosphate laundry detergent specifically designed to safely clean today's brightly colored fabrics while doing no harm to the environment. Its low foaming formula is designed to meet all federal, state, and local anti-pollution regulations, and can be used in both institutional and industrial automatic washers. This environmentally formulated detergent combines a blend of water softeners, brighteners, and cleaning agents...plus corrosion inhibitors to prolong the life of your machine.

**Echo** contains special ingredients that quickly and completely penetrate even the most ground-in soil, lifting it out of the fabric and "holding" it in suspension so the stain can be easily rinsed away without re-depositing on the fabric.

### RECOMMENDED USES:

**Echo** is manufactured especially for cleaning a full range of fabrics, including cottons, woolens, linens, rayons, synthetics, and many more. **Echo** is equally effective in cleaning delicate fabrics as well as heavily soiled work clothes. And because of the special color brighteners and cleaning agents in **Echo**, you need less to clean your wash. Economy and ecology in one package... that's **Echo!**

**Echo** can even be used as a general purpose cleaner when mixed with water. You can clean many different surfaces with outstanding results. No job is too big...for **Echo**.

## DIRECTIONS FOR USE:

**Echo** is a concentrated laundry detergent, so a little goes a long way.

## STANDARD USE AMOUNTS ARE:

### For Front Loading Machines:

Use 1/2 cup per 10 lb load of soiled laundry.

### For Top Loading Machines:

Use 1 cup per 10 lb load.

### For General Purpose Cleaning:

Mix 1/4 cup (2 oz.) **Echo** to 1 gallon water.

The exact amount of **Echo** you need depends on the size of the washer load, the hardness of the water, and the soil condition of the fabric. Use more or less as your conditions require.

## TECHNICAL SPECIFICATIONS

Biodegradable	Yes
% Phosphate	None
Optical Bleach	Present
Soap	None
Foaming	Minimal
Fragrance	Pleasant
pH of Use-Dilution (2%)	12.0 ± 0.2
Aluminum Inhibitors	Yes
Appearance	White Powder
Solubility (250 ppm Hard Water)	Complete
