

LEADER IN THE CLEANING AND
MAINTENANCE PRODUCTS INDUSTRY

Buckeye's commitment to the environment doesn't end with products. The recyclable and biodegradable Action Pac® was the first packaging type in the industry to utilize a "bag-in-a-box". In 1999, Buckeye introduced another innovative package design with the Smart Sac™ (manufactured with 60% less plastic than rigid containers). These packaging types, used in conjunction with Buckeye's patented dilution systems make Buckeye products safer to use, and eliminate product waste while promoting recycling.

The Buckeye Commitment:
To provide the most innovative, high performance products that promote human health and safety.

The end-result is a comprehensive line of products that are safer for the environment and the worker, without sacrificing outstanding performance. From specialized training programs for end-users, to timely delivery and professional support, Buckeye customers get the most innovative products and service in the industry.

INTEGRITY

Buckeye integrity may best be demonstrated
through business relationships with distributors.
Distributors of Buckeye products are guaranteed
exclusive territories — no other distributor com-
petes in that territory and carries the Buckeye
line of products. This gives Buckeye distributors a
distinct advantage and increased profitability.

INNOVATION

One of Buckeye's biggest breakthroughs was the development of patented Liquescent®
technology. This water-based technology strengthens the cleaning power of Buckeye
products, and replaces hazardous chemical ingredients including butyl, ammonia, solvents,
and alcohol bases. Buckeye's Liquescent-based floor strippers are butyl-free, cold water
activated, and effective on even the most difficult finish. Buckeye's resilient floor care
program also includes durable floor finishes that extend strip cycles while reducing product
and water usage.

REFLECTIONS

Buckeye recently introduced the **Reflections® Wood
Floor Program** offering the most environmentally
preferable oil and water-based wood floor coatings
with the lowest VOCs (volatile organic compounds) on
the market. Buckeye representatives provide hands-on
training to show customers how easy it is to maintain
their own wood floors following the Buckeye Reflections
Wood Floor Program.

SYMMETRY

In 2007, Buckeye launched its **Symmetry Hand Hygiene
Program**. This complete line of innovative hand soaps,
hand sanitizers, body washes, moisturizing lotions, and
dispensers is combined with the education and training
needed for optimal hand health in any market.
