

DYSH™

CONCENTRATED LIQUID DETERGENT

The **DYSH** Difference

Dysh is a concentrated, biodegradable, liquid detergent developed for the hand washing of dishes, glassware, pots, pans and silverware.

Dysh is formulated for performance and economy even under the most demanding conditions in fine restaurants, private clubs, school systems and hospitals.

An exceptional product with excellent wetting effects, **Dysh** does the job in half the time with less effort. Its instant acting suds cut stubborn soil faster than ordinary detergents; easily dispersing hard to remove egg residue, grease, lipstick and milk rings. Both glasses and dishes dry spotlessly clean, with or without wiping, due to the softening qualities of this superior detergent.

Available Packaging

FEATURES

- Biodegradable
- Economical
- Softens Water
- Rich Suds
- Concentrated
- Dispenses Soil Quickly

DIRECTIONS FOR USE

Effectively clean dishes, glassware, pots, pans, and silverware with as little as ¼ ounce per gallon of water with no detergent film left behind.
