

# BUCKEYE ECO® PROPORTIONING PROGRAM

# Buckeye Eco<sup>®</sup> Proportioning Program

Achieve the best overall value for each dollar spent with the fully integrated Eco Proportioning Program, designed and manufactured with proprietary technology with you, the end-user, in mind. Effective, safer, economically and ecologically friendly chemistry; hermetically sealed, flexible and sustainable packaging; together with a simplistic approach to proportioning to protect and preserve your environment.

Buckeye International is committed to providing the most innovative, high performance and cost-effective products, packaging and programs that promote human health and safety. Our Eco 1.25 L bags are manufactured with 83% less plastic than similar sized rigid containers. Because Eco products work more efficiently and their packaging is recyclable and biodegradable, you use less product and less waste ends up in landfills.

Buckeye is committed to manufacturing safer products for the worker and environment, and equally committed to uncompromised product performance. Higher concentrated Eco products outperform other green products as well as non-green, conventional chemistries.

# Eco Proportioning Systems

For more information about Eco Proportioning Program, scan this code.

## Compact

Install Eco systems in virtually any custodial closet and maximize storage space.

## Self-Contained

No contact with concentrated product and no exposed tubing.

## Cohesive User Interface & Experience

Eco Pro, Element, and Edge utilize the same user interface including system operation, labeling, icons, and seamless push and lock buttons.

## User Designated Lock

Choose between hidden and keyed integrated lock options.

## Translucent Buckets

Visual product inspection ensures product is always available.

## ASSE 1055-2018 B

Safer proportioning without the concern for back-flow or siphoning.

## Antimicrobial-Infused Discharge Tubing and Hoses

Eco Pro, Element, and Edge have antimicrobial-infused discharge tubing and hoses to prevent the growth of mold and mildew.

32 oz. Eco trigger spray bottles included for dispensing diluted product.

## Eco Pro®

Designed for broad spectrum cleaning, dilute for up to six different applications.

**4 low flow fills at 1.25 gpm**  
**2 high flow fills at 5 gpm**  
**1 water only fill at 5 gpm**

## Eco Element®

Designed for remote, satellite and focused applications, dilute for up to three different applications.

**2 low flow fills at 1.25 gpm**  
**1 high flow fill at 5 gpm**

## Eco Edge®

Designed for remote, satellite and focused applications, dilute for up to three different applications.

**1 low flow fill at 1.25 gpm**  
**2 high flow fills at 5 gpm**

# Eco Packaging

## Eco 1.25 L bags

Hermetically sealed to ensure no contamination.

Flexible to eliminate product waste, delivering a 99% evacuation rate.

Manufactured with 83% less plastic than rigid containers.

New metering plug in every bag ensures no tip clogging and highly accurate dilution.

Spill proof to prevent contact with concentrated product.

Compact size for easy transport and storage.

Over the past year, our customers prevented 28 tons of plastic from unnecessarily entering landfills by choosing Eco instead of competitive systems with rigid containers.

1 Gallon Round Jug  
takes up

**118.5X**

more landfill space

Competitor A  
takes up

**80.4X**

more landfill space

Competitor B  
takes up

**71.5X**

more landfill space

Competitor C  
takes up

**67.2X**

more landfill space

Eco 1.25 L bag  
**weighs 83% less**  
than rigid containers  
of similar size

### Competitive empty product containers vs. empty Eco product bags

1 Gallon Round Jug  
= 248 in<sup>3</sup>

Competitor A (2.5 L)  
= 168.9 in<sup>3</sup>

Competitor B (2 L)  
= 142.9 in<sup>3</sup>

Competitor C (2 L)  
= 141.2 in<sup>3</sup>

Eco bag (1.25 L)  
= 2.1 in<sup>3</sup>

Amount of landfill space taken up by empty product  
containers (in cubic inches)\*

\* Volume of space taken up by empty cartridges determined by water displacement testing.

# Eco Outer Box Packaging

Recyclable, double wall corrugated

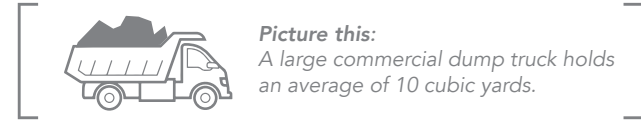

According to the Recycled Paperboard Technical Association, recycling one ton of paper would:

Save enough energy to power the average American home for six months

Save 7,000 gallons of water

Save 3.3 cubic yards of landfill space

Reduce greenhouse gas emissions by one metric ton of carbon equivalent (MTCE)

# Eco Inner Carton Packaging

100% recycled paperboard

50% less energy than virgin grades of paper board

Trees are saved

More CO<sub>2</sub> is sequestered

35% post-consumer material

Diverted from waste stream at the end of its intended lifecycle

Over the past year, based on the above recycling information, Buckeye:

Saved enough energy to power an average American home for 19 years

Saved 125.4 cubic yards of landfill space

Saved 266,000 gallons of water

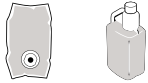

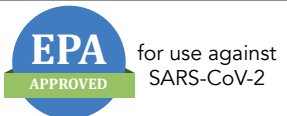

Reduced greenhouse gas emissions by 38 tons of carbon equivalent
