

Symmetry Green Certified Hand Wash SMT™

(Skin Moisturizing Technology)

Green Certified Hand Wash SMT is a foaming hand wash formulated with moisturizing technology that is designed for use by healthcare clinicians and in other institutional settings. It hydrates skin, is fragrance-free, certified by Green Seal®, and certified by the USDA as a biobased product. It contains a proprietary blend of conditioning agents (humectant, emollient, and aloe).

This new formulation was tested for sensitization on self-perceived sensitive skin subjects. No irritation or sensitization reactions such as Erythema, Edema, and dryness were observed throughout the study.

An independent GMP laboratory conducted a clinical study in which the subjects who completed the study used this product for 2 weeks. Under the conditions of this study and in the test population, there was a statistically significant improvement in the Corneometer measurement/skin surface hydration (increase in the hydration units) at Week 2. *See back page for study results.

*The clinical study showed Symmetry Green Seal Certified Handwash with SMT resulted in the **skin hydration improving 32.5%.***

86.2% of study participants showed an improvement in hand "dryness" through dermal evaluations.

Biobased Products are derived from plants and other renewable agricultural, marine, and forestry materials. They generally provide an alternative to conventional petroleum derived products and include a diverse range of offerings.

Green Certified Hand Wash SMT contains (88%) USDA certified biobased content.

FEATURES

- Proprietary blend of skin moisturizing technology
- Green Seal® certified
- USDA Certified Biobased Product
- Fragrance-free
- "No-drip" system
- 99% product evacuation
- Available in hermetically sealed bags and pump bottles

Product Quality Evaluation Data

A clinical study conducted by an independent GMP laboratory assessed the safety, moisturization efficacy, and consumer perception of Green Certified Foaming Hand Wash SMT.

	Questions	Favorable %
